

Template Projects – Social Media Post:

Team NR 02

During this year`s 5th semester projects in the faculty 07 – Textile and Clothing Technology at Hochschule Niederrhein, team 02 cooperated with the upcycling label Studio Amaran Creative for whom we developed a partwise practically approved roadmap regarding the optimization of the upcycling process of ties into fabric and manufactured clothing products. The roadmap and a belonging manual present technical, sustainable, and social optimization possibilities aiming for an industrial, circular and more efficient way of producing upcycling fashion on a larger scale. The results and possible solutions worked out by the team members, are implemented in two specially designed and manufactured upcycling clothing items.

Thanks to the owner of Studio Amaran Creative, designer Sinah Schlemmer, as well as to our steering committee member Professor Dr. Mathias Muth for supporting us throughout the entire project duration! _____
